

Cleaning the Sand & Silt Bag – 360002/360009

Carefully unlock the debris bag from the vacuum tube of your cleaner. Use your thumb to push the "U" shaped snap lock closure upward until it snaps open. Make sure to swing it away from the opening. Open the bag and remove debris.

To close, push the middle of bag inward, as shown, and bring the edges together to make them stack like an accordion. Swing the "U" shaped snap lock closure back to the closing position.

Gently push on top of the "U" shaped snap lock closure to make sure it snaps into place. Reattach the clip onto the feed hose. Your debris bag is ready to be reinstalled onto your cleaner.

If you have a lot of debris in your pool, especially after a storm, you can run your Legend® in two shorter cycles per day and empty the debris bag between cycles.

Reconnect the debris bag to the vacuum tube. Do NOT over turn.

A Helpful Hint: It is easier to empty the debris bag when it is dry. A second bag may be used while the full debris bag is drying. It's best to empty the debris bag when it becomes half full. The Legend® will have better performance if the bag is not overloaded.
