

BEER MEMBRANE FILTRATION

Pentair BMF +Flux COMPACT S8

Streamlined, Compact Beer Membrane Filtration for Dependable Brewing

The Pentair BMF +FLUX Compact S8 is a fully automated beer membrane filtration system designed for small and craft breweries that need efficiency without compromise. Handling capacities between 80 and 170 hl/h, it delivers bright beer and taste stability—without the need to use diatomaceous earth (DE). This means cleaner operations, lower waste, and safer working conditions, all in a compact footprint that fits space-constrained breweries.

FEATURES & BENEFITS

BATCH MODE	Fits small/craft brewery workflows and frequent brand changeovers.
CAPACITY: 80–170 hl/h	Matches typical craft volumes—efficient throughput without oversizing.
SYSTEM FOOTPRINT: 4.5 m (L) × 1.4 m (W) × 2.45 m (H)	Saves valuable floor space in the brewery.
PENTAIR X-FLOW HOLLOW FIBER MEMBRANE TECHNOLOGY	Built on X-Flow's proven membrane expertise for stable, high-quality filtration: <ul style="list-style-type: none"> • Beer loss as low as 0.5%. • Yeast-free, bright beer with stable taste, produced without diatomaceous earth (DE). • No diatomaceous earth (DE) handling or disposal. • Lower solid waste, improving sustainability. • Enhanced workplace safety.
FULLY AUTOMATED WITH USER-FRIENDLY PROCESS CONTROL	Frees up staff for higher-value tasks.
REMOTE SUPPORT	Quick online troubleshooting and diagnostics without on-site visits, minimizing filtration downtime.
USER INTERFACE	Intuitive design for quick, hassle-free operation.
OPTIONS: PENTAIR CARBO-CONTROLLER OR CARBOBLENDER	Flexible configuration to match your brewing process.
