RATING:

DESIGN PRESSURE/MAWP	300 PSI
	(2.07 Mpa)
MAX. ALLOWABLE TEMP	120°F
	(49°C)
MIN. ALLOWABLE TEMP	20°F
	(-7°C)
FACTORY TEST PRESSURE	330 PSIG
	(2.28 MPa)
BURST PRESSURE	1800 PSI
	(12.41 MPa)

INTENDED USE:

The Model 40E30N Fiberglass RO/UF Pressure Vessel is designed for continuous, long term use as housing for reverse osmosis and ultrafiltration elements in typical industrial water treatment systems at pressures up to 300 psi. Any make of four-inch nominal diameter spiralwound element with a 3/4" dia male product water tube is easily accommodated.

The Model 40E30N must be installed, operated and maintained in accordance with the listed precautions and good industrial practice to assure safe operation over a long service life.

The high performance reinforced plastic shell must be allowed to expand under pressure; undue restraint at support points or piping connections can cause leaks to develop in the shell. The end closures, incorporating close-fitting, interlocking metal components, must be kept dry and free of corrosion; deterioration can lead to catastrophic mechanical failure of the heads.

Pentair will assist the purchaser in determining the suitability of this standard vessel for their specific operating conditions. The final determination however, including evaluation of the standard material of construction for compatibility with the specific corrosive environment, shall be the responsibility of the purchaser. Alternate materials with enhanced corrosion resistance are available on special order.

Specifications are subject to change without notice.

NOTE

Spiral Retaining Ring Removal Tool (50303) Recommended to open and close vessel.

PRECAUTIONS:

- DO...read, understand and follow all instructions; failure to take every precaution will void warranty and may result in vessel failure
- DO...mount the shell on horizontal members at span "S" using complaint vessel supports furnished; tighten hold down straps just snug
- DO...provide flexibility in, and support for piping manifolds so that vessel can grow in length under pressure without undue restraint; provide additional flexible joints in large pipes leading to manifold header
- DO...provide overpressure protection for vessel set at not more than 105% of design pressure
- DO...inspect end closures regularly; replace components that have deteriorated and correct causes of corrosion
- DO NOT...work on any component until first verifying that pressure is relieved from vessel
- DO NOT... make rigid piping connections to ports or clamp vessel in any way that resists growth of fiberglass shell under pressure: $\Delta DIA = 0.01$ in. (0.25mm) and $\Delta L = 0.03$ in. (0.8mm) for a length code -1 vessel
- DO NOT... hang piping manifolds from ports or use vessel in any way to support other components.
- DO NOT... operate vessel at pressures and temperatures in excess of its rating
- DO NOT... operate vessel without element installed
- DO NOT... operate vessel with permeate pressure in excess of 125 psi at 120°F (0.86 MPa @ 49°C)
- DO NOT... overtighten the connection to the permeate port (hand-tighten plus one-quarter turn, check for leaks)
- DO NOT... tolerate leaks or allow end closures to be routinely wetted in any way
- DO NOT... pressurize vessel until double-checking to verify that the retaining ring is completely inside the groove
- DO NOT... operate outside the pH range 3-11.
- DO NOT...operate outside the pH range 2-12 for
- DO NOT...exceed 43.5 hours in a year for cleaning with above mentioned pH range.

Caution:

Eye Protection Should Be Worn When Removing Or Installing Retaining Rings.

Keep Fingers Clear From Retaining Ring While Installing Last Of Two Turns. Ring May Snap Into Position Possibly Pinching Fingers.

ORDERING:

you require and fax them with your purchase order to our customer service department for expedited processing.

For optional materials and/or features not listed below, please consult factory for pricing and availability.

Using the chart below, please check the features Please note that we require your membrane brand and model number when ordering. If this information is not initially available, you may provide it at a later date by checking the appropriate box below.

VESSEL LENGTH CODE – please check one

MODEL 40E30N □ -1 □ -2 □ -3

MEMBRANE BRAND AND MODEL - please check one and fill in information

☐ Please supply end plugs for the following membrane brand and specific model

Model

	Membrane brand and model information is not available, but will be supplied to Pentair on obefore the following date//						
	CERTIFICATION – please check one ☐ CE Marked – MODULE-D1, CATEGORY-2 (Not applicable for -1 vessel) ☐ Certified by Pentair.						
EXTERIOR FINISH – please check one ☐ Standard – Blue high-gloss RAL 5010 polyurethane coating over sanded surface. ☐ Optional – White high-gloss RAL 9003 polyurethane coating over sanded surface.
