Sanitization made super simple.

High capacity feeders are one of the easiest ways to sanitize large residential and commercial swimming pools using either chlorine or bromine slow-dissolve tablets. These heavy-duty, high capacity feeders provide automatic sanitization for pools up to 658,500 gallons. They are designed for offline plumbing installations using one-inch PVC pipe and are available in three sizes to fit a variety of pool applications.
HIGH CAPACITY CHLORINE/BROMINE FEEDERS

The performance leader in automatic sanitization for large residential and commercial pools.

The INLET control valve side of the feeder connects to the plumbing on the discharge side of the pump, before the filter. The OUTLET side of the feeder connects to the pool return line after the filter and/or heater, pool cleaner, diverter valves or any other installed equipment. Installation of a corrosion-resistant check valve, such as R172288 by Pentair, between the feeder inlet and outlet and the equipment is strongly recommended to check backflow of chemicals. This helps ensure equipment longevity.

KEY FEATURES

- **Heavy-duty control valve**
  For accurate feed rate adjustment.

- **Completely enclosed system**
  Prevents fumes from escaping—no special venting required.

- **Easy access design**
  For easy recharging, servicing and simple maintenance.

- **Threaded fittings included**
  Standard threaded inlet and outlet fittings included for easy installation.

- **Certified to NSF/ANSI 50**

1. **Vent valve**
   bleeds air to ease lid removal.

2. **Lock ring**
   spins off, freeing lid and providing easy access. Snap-lock provides secure seal.

3. **Screen and check ball**
   are easy to reach for cleaning and periodic maintenance.

4. **Flow-through circulation**
   allows maximum output of sanitized water.

5. **External dial control**
   for easy flow rate adjustment.

6. **Drain valve**
   makes it easy to drain feeder for safer recharging and winterizing.

7. **Unions**
   are included for easy installation.

**Note:**

- **Calcium Hypochlorite is not to be used in any form.**
  Use of chemicals other than those recommended by manufacturer may be hazardous.

- **Maximum working pressure—50 psi.**
- **NSF 50 Certified for public and residential use in swimming pools, spas or hot tubs using 1” Trichlor tablets and when used with a flow-indicating device, such as Model #R172080.**
- **Results based on use of 1” Trichlor tablets.**
- **Maximum operating flow—34 GPM.**
