HIGH CAPACITY ADJUSTABLE ION-SELECTIVE FILTER OFFERS TAILORED REDUCTION OF TOTAL DISSOLVED SOLIDS, CHLORIDES AND SULPHATES

Applications

Coffee
Espresso
Direct Injection Combi Ovens
Hot Drink Vending

Features & Benefits

Unique water conditioning technology combines mineral adaptation, mineral stabilization and corrosion inhibition.
Features a 6-stage filtration process that includes:
- Prefiltration
- Hardness adjustment
- Anionic mineral adjustment
- Fine filtration
- Highly efficient carbon block
- Solid membrane filter

Installs and protects equipment from scale and mineral-induced corrosion in areas with high total dissolved solids (TDS), chloride (Cl-) and sulphate (SO\(_4\)) content in the feed water.
Tailored adjustment of TDS reduction, Cl- and SO\(_4\) levels
Removes harmful contaminants and unpleasant odors and tastes
Removes particles down to five (5) microns for highest equipment protection

Installation Tips

The system can be operated freestanding, lying horizontally or vertically.
Water pressure at the filter system inlet must not exceed 116 psi (8 bar). A pressure reducer valve must be installed on the water supply side of the filter system if the inlet pressure exceeds 116 psi (8 bar).
Shutoff valve must be installed upstream of the filter.
Refer to Installation, Operation & Maintenance Manual for cartridge flushing and start-up.

Operation Tips

Change Claris Prime Cartridge when its precalculated water volume has been reached or at least once per year.
Change cartridge when capacity is reached.
Always flush the filter cartridge at time of installation and cartridge change.
Do not use hardness test strips to check for hardness reduction. Please use a titration kit to check for hardness reduction.
Always test for TDS and chloride content of incoming water.

Sizing

Service Flow Rate: 1.0 gpm (3.79 Lpm)
Rated Capacity:
1,255 gallons (4,750 L) for Espresso
557 gallons (2,110 L) for Direct Injection Combi Ovens
Note: This capacity is based on influent water TDS of ppm, hardness of 180 ppm and chloride of 60 ppm with standard bypass settings.

Foodservice | EV439-86 Spec Sheet
**SPECSIFICATIONS**

**Service Flow Rate**
1.0 gpm (3.79 Lpm)

**Rated Capacity**
1,255 gallons (4,750 L) for Espresso
557 gallons (2,110 L) for Direct Injection
Combi Ovens

Note: This capacity is based on influent water TDS of ppm, hardness of 180 ppm and chloride 60 ppm with standard bypass settings.

**Pressure Requirements**
29 - 116 psi (2 - 8 bar), non-shock

**Temperature Limits**
39 - 86°F (4 - 30°C)

**Overall Dimensions**
18.56” H x 6.89” D (47.1 x 17.5 cm)

**Electrical Connection**
None required

**WARRANTY**

Everpure Claris Prime by Pentair® water treatment systems are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. Everpure replaceable elements (filter cartridges and water treatment cartridges) are covered by a limited warranty against defects in material and workmanship for a period of one year after date of purchase. See printed warranty for details. Pentair will provide a copy of the warranty upon request.
