STEP 1
Install the pipe into the hub. Insert the hub through the 6" opening in the tank. Thread diffusers into the hub. Install the o-ring into the 6" SNA flange. Thread the top stack diffuser system into the 6" SNA flange.

STEP 2
Assemble as shown.

STEP 3
Using 1/2" wrenches, tighten 5/16" x 2-1/2 long bolts alternately, as shown, until the flanges are flush with each other and seal is obtained.
