

HOW TO IDENTIFY THE CORRECT FILTRATION SOLUTION

Steam equipment is made by numerous manufacturers and come in different shapes and sizes – we’ve made it easy to design the right solution in three easy steps!

1

Determine the type of steam equipment

There are only two types of steam equipment

Boiler-based Steam Equipment

Boiler-based steam equipment will have a basin of water that is within the equipment

Boiler-less / Spritzer / Flasher Steam Equipment

Boiler-less steam equipment dispenses water onto a heated surface to generate steam

OR

2

Estimate the size of the equipment

Number of trays / pans give you the size of the equipment

Steam equipment can be based on the **number of pans or racks** that an oven has!

Some ovens are stacked on top of each other, so remember to count both!

3

Analyze your customer's water

Water quality plays a significant role in designing a steam filtration solution – have options to assess it

- A** Call us at 800.942.1153 to **receive local water information**
- B** Use our **H2O express test kit**
- C** If you can't wait, we **recommend EZ-R0** as the safe solution

SELECT FROM THE PRODUCTS AT THE BACK OF THIS PAGE

EVERPURE® MAKES PRODUCT SELECTION EASY

Steam equipment type	Water quality	Size of steamer/ combi oven	Recommended product	
Boiler-based	N/A	< 6 pans		Kleensteam CT (EV9797-50)
		> 6 pans		Kleensteam II Single / Twin (EV9797-21 / EV9797-22)
Boiler-less / Spritzer / Flasher	Good water	All sizes		Kleensteam II Twin w/o feeder (EV9797-40)
	Problem water (high TDS, hard minerals, high chlorides)	< 10 pans		EZ-RO 200/10G (EV9975-53)
		> 10 pans		EZ-RO 375/16G (EV9975-58)
		Two or more ovens (Stacked)		EZ-RO 375/50ATM (EV9975-69)
	We have dedicated solutions for extreme problem water (e.g., the QT product series for high chloramine water). Call tech services at 800.942.1153 for consultation.			

SELECT THE **RIGHT** EVERPURE PRODUCT **ANYWHERE, ANYTIME**
