REVERSE OSMOSIS WATER TREATMENT SYSTEM WITH STORAGE TANK

System:

- BWS1500/175 HF Plus: 164-15576

Replacement Cartridges:

- CTO-Q: 300-05830

- MA-Q15: 300-05855

Replacement Membrane:

- AMS-4021XLE: 204-44021

APPLICATIONS

- ◆ Any foodservice equipment where it is desirable to remove existing Total Dissolved Solids (TDS) and provide a consistent balance of buffered TDS. Designed for multiple point-of-use applications where up to 10 gpm is required.

FEATURES • BENEFITS

- ◆ Significantly reduces scale and corrosion problems related to high TDS, water hardness and chlorides
- ◆ Microprocessor controller provides system status and pump time-delay on start-up for pump protection
- ◆ Rotary vane pressure pump assures consistent production
- ◆ Adjustable reject flow control minimizes water use due to seasonal fluctuations in water temperature
- ◆ Precision blending valve allows the user to accurately and precisely blend filtered water with mineral-addition water to a desired optimized TDS Level
- ◆ High capacity Pre-filters take out sediment and chlorine and protect the RO membrane
- ◆ Digital before-and-after TDS meter for push-button monitoring of membrane performance and optimized water quality
- ◆ Sample port enables quick and simple system checks and adjustments
- ◆ Built-in pressure gauge allows visual monitoring of operating pressure
- ◆ Integrated system bypass valve reduces down-time or service interruptions
- ◆ All consumables are easy-to-change Qwik-Twist cartridges
- ◆ 1" high-flow outlet for high demand applications

INSTALLATION TIPS

- ◆ Feed water connection to system should be COLD only. Tempered water up to 80°F (26.6°C) can be used.
- ◆ Do not exceed system specifications for temperature and pressure.
- ◆ Provide a dedicated water line of at least 1/2" I.D. to the unit for consistent flow and pressure to the system.
- ◆ Allow 3" clearance below system for filter cartridge removal and replacement.
- ◆ Connect filtered water line to steam production connections only. Do not use for condensate or wash-water.

- ◆ Detailed installation, operation and maintenance manual is included with each system.
- ◆ Mount the unit where it can be easily viewed and accessed.

SIZING

- ◆ Drain Connection: 5.0 gpm Minimum Flow
- ◆ Storage Tank Capacity: 175 gals.

OPERATION TIPS

- ◆ Change cartridges on a regular six (6) month preventative maintenance program.
- ◆ Change cartridges when capacity is reached or when flow becomes too slow.
- ◆ Membrane life varies depending on feed water conditions and pre-filter maintenance. It is recommended to replace the membrane every 18 months.
- ◆ Always flush the filter cartridge at time of installation and cartridge change.
