2SR-BW Endurance®
Feeder Kit: EV9798-70

2SR-BW QL2 General Purpose
Feeder Kit: EV9798-75

APPLICATIONS

Multiple equipment and combination applications
High volume installations

Ice machines
Drip coffee machines

FEATURES • BENEFITS

Helps to prevent mineral scale from accumulating inside ice machines and coffee brewers, reducing potential performance issues and downtime, and extending the life of the equipment

Sanitary cartridge replacement is simple, quick and clean; internal filter parts are never exposed to handling or contamination

Estimated one (1) year of scale protection

Controls scale formation to extend membrane life in reverse osmosis systems

Adds an additional scale inhibitor to the Everpure Endurance High Flow System, for when there are multiple ice machines on location

INSTALLATION TIPS

Install vertically with cartridge hanging down.

Allow 2½" (6.3 cm) clearance below the cartridge for easy cartridge replacement.

Flush 2SR-BW Cartridge by running water through filter for three (3) minutes at full flow.

Adequate space for "in" and "out" water line connections.

Apply 2SR-BW Endurance Feeder Kit to existing Endurance systems that need additional scale inhibition protection.

OPERATION TIPS

Change cartridges on a regular one (1) year preventative maintenance program.

Change cartridges when capacity is reached or when pressure falls below 10 psi.

Always flush the filter cartridge at time of cartridge change.

Replace cartridge when flow rate becomes inconveniently slow or before rated capacity is reached.

Product performance may vary according to flow rate, influent line pressure and local water conditions.
