Flush cartridge by running water through system for five (5) minutes at full flow.

Inspect O-ring during each cartridge change. Lubricate and/or replace if necessary.

OPERATION TIPS

Replace cartridge when flow rate becomes inconveniently slow or before rated capacity is reached. It is recommended to replace cartridge at least once per year.

Change cartridges when capacity is reached or when pressure falls below 10 psi (0.7 bar).

Always flush the filter cartridge at time of installation and cartridge change.
