

# TRITON® II

## SAND FILTER WITH CLEARPRO TECHNOLOGY®

The #1 sand filter in the world is now capable of “polishing” pool water like never before.

Filtration engineers talk about “polishing” water. It means stripping all visible contaminants for sparkling clarity. In the past, sand filters were not capable of this performance, but they were legendary for their dependable service and low maintenance requirements.

Today, thanks to ClearPro Technology, the world’s #1 sand filter can achieve “polished” water quality. Plus, the Triton II filter retains its position as the filter that requires the least attention from you.

The secret is a component inside the filter—a porous tube through which water must pass before it reenters the pool. It creates a final barrier to the small particles sand cannot stop, including the finest dust particles, algae and pollens. The result is dazzling water clarity—a level not attainable by any sand filter without ClearPro Technology.

**TRITON® II SAND FILTER WITH CLEARPRO TECHNOLOGY®**

Keeping it simple while making it sparkle.

The Triton II filter remains blissfully simple, requiring less maintenance than either cartridge or Diatomaceous Earth (D.E.) filters. Just an occasional backwashing with the turn of a valve is all it takes to keep the Triton II filter delivering the clearest water year after year.

Besides its superior filtration performance, the Triton II filter with ClearPro Technology delivers a level of dependability and ease of operation and maintenance for a track record that's unsurpassed. Every design detail has been refined to make the Triton II filter the industry standard.

**KEY FEATURES**

**Heavy-duty closure**

For easy access with built-in pressure relief valve makes inspection and maintenance fast and easier.

**Swing-away water diffuser**

Allows instant access to sand and all internal parts.

**One-piece fiberglass-reinforced tank**

UV-resistant surface finish for years of unequaled strength and durability.

**Flow system design**

Controls filtration quality and helps ensure maximum run times between backwashing to save you time.

**Threaded internal parts**

For ease of maintenance.

**Threaded bulkhead connectors**

For easier installation and service.

**Combination sand-and-water drain**

Speeds servicing and winterizing.

Model Number	Filter Area Sq. Ft.	Vertical Clearance*	Filter Diameter	Required Sand† (lbs.)	Flow Rate GPM		Turnover Capacity-Res. (Gallons)		
					Res.**	Comm.	8 hrs.	10 hrs.	12 hrs.
TR 60 CP	3.14	37.5"	24"	325	63	63	30,240	37,800	45,360

\* Required clearance to remove the closure.  
 † Use standard #20 silica sand.  
 \*\* Maximum flow rate. Flow rate is based on 20 GPM per sq. ft. of filter area. Actual system flow will depend on plumbing size and other system components.

The graphics at right illustrate, in a technically accurate way, the difference when ClearPro Technology is at work—far superior water clarity. The difference is particularly dramatic at night when pool lights can highlight particles in the water—not so when ClearPro Technology is on the job.
