

# ULTRATEMP ETI<sup>®</sup> HYBRID HEATER

The first pool heater to combine a  
heat pump and gas-fired heater

[pentair.com/hybridheater](http://pentair.com/hybridheater)

# ULTRATEMP ETi<sup>®</sup> HYBRID HEATER

## POOL HEATING REDEFINED

The UltraTemp ETi Hybrid Pool heater is the first of its kind to combine heat pump and gas-fired pool heating technology. So your pool is ready when you are, no matter the season.

# THE BEST OF BOTH WORLDS

Technology so advanced, it combines the quick boost of a gas fire for fast pool heat up with the long-term efficiency and durability benefits of a heat pump.

## Intuitive intelligence

With a few easy selections, the UltraTemp ETi Hybrid Pool Heater automatically optimizes its operation for fast heat-up or maximum efficiency.

## Four optimized Modes:

**Heat Pump**—Maximum efficiency.

**Gas Heat**—Powerful heat output.

**Hybrid Mode**—Optimized efficiency and cost savings.

**Dual Mode**—Maximum heat output and fast heat-up time.

You have the freedom to choose the mode yourself or to rely on the heater's built-in intelligence.

## Built to last

Built with dual titanium heat exchangers for superior durability and long-term performance.

## Powerful heat on demand

Gas-fired functionality for quickfire pool heat-ups.

## Automation-ready

Set the perfect water temperature from your phone with IntelliCenter® and EasyTouch® Automation Systems.

## Our guarantee

The gas-fired titanium heat exchanger carries a three-year warranty, while the titanium heat pump exchanger carries a **lifetime warranty**.

## Environmentally friendly

The UltraTemp ETi Hybrid Heater's ultra-efficient technology provides the ultimate solution for environmentally responsible pool heating technology.

# CONNECT WITH TOMORROW'S INNOVATION TODAY

## Heat-up speed that leaves ordinary heat pumps behind

Stand-alone heat pumps don't always deliver fast heating, especially when days and nights are cooler. With its gas-fired boost, the UltraTemp ETi® Hybrid Pool Heater delivers much shorter heat-up times than a standard heat pump, even when temperatures drop.

## Remarkable energy savings

The UltraTemp ETi Hybrid Pool Heater can save you up to \$1,250 per swim season compared to operating a gas-fired heater.\*

## Two heating technologies in a single unit

With both gas-fired and heat pump technologies in a single unit, the UltraTemp ETi Hybrid Pool Heater delivers the combination of speed and efficiency to be ready exactly when you are.

## Hours to complete 15°F heatup\*

\*Statements of heater/heat pump performance are based on estimates. Actual performance may vary and is not guaranteed. Estimates for heat-up time and temperatures are based on operation in a controlled environment. Real-world operational results may vary due to various factors and variables, including, but not limited to, environmental conditions, geography, elevation, seasonality, weather, wind, sun exposure, humidity, precipitation. Other factors of the pool that may impact heating performance include design and configuration, volume/size, orientation, R-value of construction materials, plumbing length/materials, operating conditions and more. Pentair recommends consulting a pool professional for assistance with heater/heat pump sizing for specific locations and environmental/operational conditions. Estimates are based on average U.S. air temperatures and maintaining a 17,000-gallon pool at an 82°F target water temperature for an uncovered pool operating March–October under moderate wind conditions with an electricity cost of \$0.12/ kWh and natural gas cost of \$1.10 per 100,000 BTU and comparing energy use to a gas heater that is 82% efficient.

The UltraTemp ETi® Hybrid Pool Heater has earned the Eco Select® brand distinction as one of the greenest and most efficient choices from Pentair.

The TradeGrade family of products is exclusively made for and sold by the world's most demanding pool professionals.
