TRITON® C SERIES
COMMERCIAL SAND FILTERS

For commercial and high-end residential swimming pools and other water applications. Available in flow rates from 98 to 141 gallons per minute.

Triton C and C-3 Series filters are designed for high efficiency and easy maintenance in high capacity commercial pool applications. A superior internal design levels the sand bed and produces an even water flow for the most efficient filtration possible. Our multi-diffuser system and slotted layer design give the Triton C filter superior filtration capacity and flow for longer cycles between cleanings, which significantly reduces operating costs.

Three-inch bulkheads (C-3 models) cut friction loss in half, and flanged connections don’t require special adapters.

The Triton C Series filter is engineered with single-piece tanks for superior strength, and made from the toughest materials available to withstand harsh chemicals and weather.

Capable of increased flow rates to 20 gpm per square foot of filter media, these filters are ideal for commercial applications and tandem installations when several filters are required.

STANDARD FEATURES
• 2” and 3” plumbing connections for maximum flow.
• 2” drains for easy winterizing.
• C and C-3 Series filters available in 30” and 36”.
• Can be combined for tandem installation.
• NSF Listed.
TRITON® C SERIES
COMMERCIAL SAND FILTERS

TRITON HD FILTER

The Triton heavy duty (HD) filter is a thirty-inch fiberglass filter that offers a maximum operating pressure of 75 PSI. This filter is specifically designed for special high-pressure commercial applications that require up to 98 gpm, and is ideal for all heavy-duty commercial applications.

*15 GPM/sq.ft. typical commercial flow rate, Triton C Filters are NSF approved for 5-20 GPM/sq.ft.

Note: 6" piping needs to be rotated upward as shown at 25° so handle will clear the floor.
