WPCC Series

hexametaphosphate crystal cartridges

SCALE PREVENTION CARTRIDGE FOR ANY APPLICATION

WCPP Series filter cartridges contain food-grade hexametaphosphate that dissolve slowly in water to inhibit scale and rust build-up.

They are effective for treating scale, corrosion and iron problems for up to six months.

This type of treatment is recommended for use with **tankless water heaters, regular water heaters**, ice machines, coffee and vending machines, food service equipment, water heaters, air conditioning equipment and many other types of water processing equipment.

features

- Hexametaphosphate crystals help prevent lime and scale deposits
- Effective for treating corrosion and iron problems
- All FDA-grade materials
- 5 gpm flow rate

benefits

- Reduces salts, dissovled minerals, bad taste and odor
- Designed for chlorinated and non-chlorinated water
- Fits any standard clear housing

specifications & performance

Model	Maximum Dimensions	Initial ΔP (psi) @ Flow Rate (gpm)
WPCC	2⅞" x 9⅝" (73 mm x 138 mm)	up to 5 gpm (19 Lpm)

materials of construction

Filter media	Food Grade Polyphosphate
Shell	Polypropylene
Post-Filter	Polypropylene
Gaskets	Buna-N®
Temperature Rating	40-100°F (4.4-37.8°C)

CAUTION: Eye irritant. Contains sodium calcium hexametaphosphate. Avoid contact with eyes. In case of eye contact, flush with water for 15 minutes, get medical attention. Keep out of reach of children.
WARNING: For drinking water applications, do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
NOTE: With steamers, the water should be flushed daily.
CAUTION: Do not use this cartridge on water that will be carbonated.

NSF

System Tested and Certified by NSF International against NSF/ANSI Standard 58 for the reduction of the claims specified on the Performance Data Sheet.
