

sediment cartridges

W5P
W25P

spun polypropylene

- ★ Manufactured from pure 100% polypropylene
- ★ Spun fibers provide a gradient density from the outer surface to inner core
- ★ High dirt-holding capacity and superior sediment filtration
- ★ Excellent chemical resistance

The W5P is Tested and Certified by NSF International.

WPD-110
WPD-25

thermally bonded polypropylene

- ★ Manufactured from pure 100% polypropylene
- ★ More efficient than resin bonded cartridges
- ★ Thermal bonded micro-fiber construction
- ★ Withstands high pressure differentials
- ★ Available in three micron ratings

Tested and Certified by NSF International.

W30PE
W50PE

pleated polyester

- ★ Polyester media is extremely durable and reusable*
- ★ Excellent for well water applications
- ★ Reduces particles as small as 30 & 50 micron in size by mechanical means

**Reuse not recommended for potable water applications*

W5CP
W20CLA

pleated cellulose

- ★ Economical priced
- ★ Pleated design maximizes dirt-holding capacity
- ★ Reduces particles as small as 5 & 20 micron in size by mechanical means
- ★ Designed for municipal/chlorinated water (not recommended for well water applications)
- ★ Good for general purpose filtration

W50W

polypropylene string wound

- ★ Economically priced
- ★ Designed for sediment reduction including sand, silt, scale and rust particles
- ★ Ideal for well water applications
- ★ Good for general purpose filtration
