

FAIRBANKS NIJHUIS™

BIFLOW PUMP

A revolutionary submersible or dry installed mixed flow pump capable of pumping in either direction while efficiently moving large amounts of water.

- Tailor made solutions for customer needs, which - among others - resulted in the development of the BiFlow pump, originally for the maritime industry.
- A bi-directional, in-line pump configured symmetrically containing two counter-rotating impellers with variable speed.
- Symmetrical configuration ensures a high efficiency and controlled flow in both directions.
- Capacity up to 3000 m³/h
- Pressure Heads up to 25 mlc
