

HYPRO® 9306 SERIES

High Performance and High Efficiency Centrifugal Pumps

Features & Benefits

- Designed for high efficiency, resulting in higher flow at working pressure
- The Life Guard® silicon carbide seal comes standard in all 316 stainless steel models and is available as an option in cast iron models
- Available with universal flanged ports (300 x 220 or 220 x 220) for quicker installation and serviceability (220 x 220 only available on cast iron models)
- Cast iron or 316 stainless steel materials available for flexibility in pump selection
- Cast iron models come equipped with stainless steel wear rings for extended life in normal chemical spraying applications
- The most robust hydraulic motor in the crop spraying industry significantly reduces downtime and increases spraying days

Now available with 300 x 220 universal flanged ports in both cast iron and stainless steel.

316 stainless steel models come equipped with Life Guard silicon carbide mechanical seals and are available when more protection is required for pumping highly corrosive spray solutions.
