

HYPRO® 9307 SERIES WITH FORCEFIELD™ TECHNOLOGY

High-Flow Hydraulic-Driven Centrifugal Pumps

Features & Benefits

- NEW ForceField seal technology to protect your pump against today's harshest application environments:
 - Eliminates dry run
 - Eliminates chemical and fertilizer bonding failures
 - Prevents costly in-season downtime
 - Maintenance-free operation
 - Self-regulating chamber designed to provide pressure when needed and safe serviceability when it is not needed
 - Direct drop-in for current 9307 designs
- Components designed for today's high volume liquid fertilizer application on large capacity sprayers:
 - Hydraulic motor includes a case drain for maximum motor life
 - 316 stainless steel impeller
 - Two-piece shaft design includes 416 stainless steel wet end and 8260 hardened steel drive end
 - Bearings designed to handle continuous high volume pump loading
- Capable of flows over 370 GPM (1400 L/min) at 40 PSI (2.8 bar)
- 300 universal flange inlet x 220 universal flange outlet
- One-year warranty that includes pump, motor and seals

The ForceField seal technology is designed to protect against today's harshest chemical and application environments. This technology automatically adjusts seal chamber pressure to the right levels to ensure seal life.

High-flow centrifugal pumps from Hypro handle high-volume spraying applications at increased field speeds, allowing applicators to spray more fields faster, resulting in decreased spraying time and increased profits.

Industry first, 1-Year Warranty includes: Pump, Motor & Seals.

HYPRO® 9307 SERIES WITH FORCEFIELD™ TECHNOLOGY
