**American Mode:**  
Patriotic red, white and blue transition

**Caribbean Mode:**  
Transitions between a variety of blues and greens

**Royal Mode:**  
Cycle that selects only rich, deep tones of color

## BETTER LIGHT DISPERSION.

The innovative lens geometry and reflector design of the IntelliBrite 5g Lights provide a choice in positioning based on a pool's shape and layout. The default wide mode is used for lights in the side of pools, while the narrow mode is used for lighting under diving boards and can illuminate the length of the pool. Plus, the IntelliBrite 5g's light beam distribution eliminates "hot spots" and glare.

\*Appearance of color and white LED light may vary between various models of lights. Appearance and perception of pool lighting may vary depending on a number of factors including, but not limited to, the particular model of light, the location/depth/angle of the light's installation, pool finish/material, pool depth/shape/geometry, ambient light sources, subjective factors and more. For best results when using multiple lights, use all the same model and do not mix multiple models of lights within a single installation.
