

PENTAIR® GRINDER RAIL ADAPTER

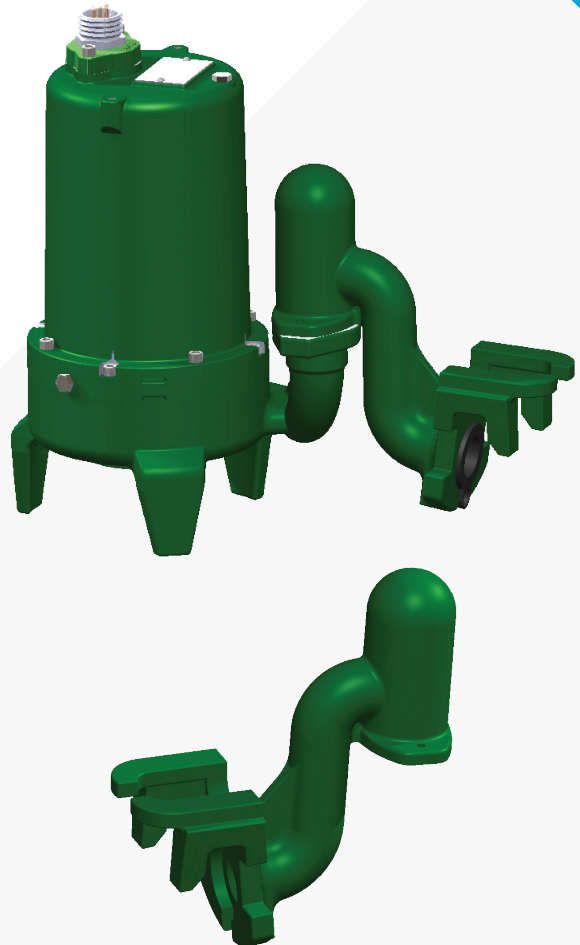

Pentair believes in helping our customers with solutions to utilize their existing resources. We have developed an adapter that allows you and your customers to reuse your existing Liberty Pumps® GR20 Rail System base and change to a vertical discharge Pentair Grinder Pump. This adapter will also help you avoid having to remove your current guide rail from its existing station.

The volume and type of debris found in today's wastewater systems creates buildups in sewers. Pentair Grinder Pumps are engineered to slice mass debris and clogs that can develop in sewer systems. We recommend using Pentair Myers® V-Series Grinder Pumps featuring our Patented Axial Cutter Technology. This design cuts the material into smaller pieces and pushes larger pieces away, avoiding most buildups that can damage the pump.

Retrofit your existing system. Change to an axial cutter today!

FEATURES

- ◆ Change a 1.25" vertical discharge to horizontal
- ◆ Reuse your existing Liberty Pumps GR20 Rail System Base
- ◆ Includes a mating flange, sealing grommet and a built-in check valve
